DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: all elements in Fig. 1C(1) and 1C(2); W3, W4, W5, W6, A1-A6, D1-D6 Dual-Port **RAM** in Fig. 2; W1, W3', W5', W2, W4, W6 and Dual-Port **RAM**, Interleaved **Write** Operation in Fig. 3. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: N4 (line 27, page 3); node N (line 29, page 3). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
3. The drawings are objected to because labels B, B1, B, 1, B and 2 in Fig. 1B should be changed to BB1, B1 and B2. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Art Unit: 2818

4. Claim 6 is objected to because of the following informalities: the phrase "pull-down" (line 4) should be changed to ---pull-up---; non-elected claims 9-12 should be canceled in response to this office action. Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It is not understood how the dual-port SRAM cell in Fig. 1A of the present invention can properly operate without having the upper high power supply.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-8 are, insofar as understood, rejected under 35 U.S.C. 102(b) as being anticipated by Lattimore et al., 5,877,976.

Lattimore et al., 5,877,976, discloses in Fig. 6 a dual-port SRAM cell comprising: two nMOS pull-down transistors N1 and N2;

two pMOS pull-up transistors P1 and P2;
two nMOS first pair of transfer transistors N3 and N4;
two nMOS second pair of transfer transistors N5 and N6;
a first pair of bit lines port1 true and port1 comp;
a second pair of bit lines port2 true and port2 comp;
a first word line port1 word line;
a second word line port2 word line.

Conclusion

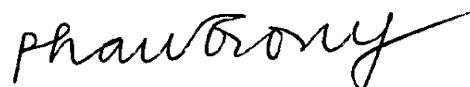

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2187

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-8, drawn to a dual port static random access memory (SRAM) cell, classified in class 365, subclass 154 or 156.

II. Claims 9-12, drawn to a high speed SRAM architecture including a cache, classified in class 711, subclass 118+.

The inventions are distinct, each from the other because:

The inventions of Group II and Group I are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the high speed SRAM architecture may utilize many different SRAM cells and is not limited for use with the SRAM cells of Group I. The subcombination has separate utility such as a storage device in a wide variety of different computer systems and devices, and is not restricted for use with the high-speed SRAM architecture including a cache such as in Group II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, and because the searches required for the different Groups are not coextensive, restriction for examination purposes as indicated is proper.

Art Unit: 2187

A telephone call was made to William Roch (Reg. No. 24,972) on July 18, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn Gossage whose telephone number is (703) 305-3820.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-3900.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Donald Sparks can be reached on (703) 308-1756.
